Practice

One:

I want to know what my average for 3 test scores are. I must be able to input my 3 test scores.

Print my average to 2 decimal points.

Two:

I want to be able to enter my name and age, then print out

My name is variable and I am variable years old.

Three:

I want to know what my gross pay will be this week. you will have regular hours, overtime hours and pay rate. your regular hours are multiplied by pay rate. your overtime hours are multiplied by one and half of pay rate. we will not do taxes right now.

What is my gross pay – print.

Four:

Design and

- create a program that accepts 2 grades as ints (a – 4, b – 3, etc)
- accepts the credit hours for the two classes(individually)
- must take grade * creditHours (individually) then add the two together
- Divide that value by totalCreditHours to get gpa.
- Print your current gpa
